

RR DONNELLEY

INSTRUCTIONS FOR LOADING EXTENSIONS

CREO DISTILLER ASSISTANT

The Creo Distiller Assistant helps Acrobat Distiller produce press-optimized, spot-color-enabled, top quality PDF for a composite PDF 1.3 or PostScript 3 workflow. The Creo Distiller Assistant is always active and automatically does its job by intercepting and improving various PostScript constructs. Note that this software is compatible with Adobe Acrobat 4.0 (or newer) for Macintosh.

Copy the file "CreoDistillerAssistant" to your Adobe Acrobat>Distiller>Startup folder. Important: delete any file named "Example.ps", "PrinergyForDistiller" and "Synapse Distiller Startup" from Distiller's Startup folder. These files can interfere with the proper operation of the Creo Distiller Assistant. Restart your computer to activate CreoDistillerAssistant.

PITSTOP PROFILES

PitStopProfiles allows you to use RR Donnelley's preferred Pitstop settings when evaluating your files.

To load these profiles open Acrobat and follow these steps.

1. select the Window Tab
2. select Show Pitstop Preflight Panel
3. select the Managing Tab
4. select Import
5. locate the profiles on your system
6. select open to activate the profiles in Pitstop
7. The profiles should now appear on your list of choices for evaluating files using Pitstop.
